EXPERIENCE

Capgemini

Software Engineer

Jun 2025 – Present

Gurgaon, India

- Diagnosed and resolved 12+ critical bugs in production systems via structured log analysis and root-cause investigation, improving application stability for customer-facing workflows.
- Optimized React front-end components, reducing average page load time by ~20% and improving user engagement metrics across the web platform.
- Applied HTML5, CSS, and JavaScript standards across 5+ frontend modules to ensure WCAG-compliant, cross-browser-compatible web content on all major browsers.
- Developed and maintained 8+ REST APIs using Java and Spring Boot, cutting average API response latency by 15% for high-volume transaction flows.
- Authored a library of 10+ reusable React components in HTML5 and CSS, reducing UI development effort by 30% across 3 consecutive sprint cycles.
- Completed 100% of assigned sprint tasks on time over 6 Agile sprints, collaborating with QA teams to maintain a defect rate below 5% per release.

PROJECTS

LG 5G NR Development – PDCCP Layer MBS Features

C / C++, Linux, Telecom Protocols, Jira

Oct 2025 – Present

Capgemini

- Engineered 5+ PDCCP features for 5G NR including message parsing, API handlers, and memory optimizations, reducing memory overhead by an estimated 18%.
- Resolved 10+ GQA and customer-reported defects through root-cause debugging, contributing to measurable improvement in production release stability.
- Coordinated with 3 client-side teams to deliver production-ready fixes within agreed SLA windows, achieving a 95%+ on-time delivery rate.

Banking System – Enterprise Financial Application

Java, Spring Boot, React, MySQL, REST API

Jun 2025 – Sep 2025

Capgemini

- Architected and deployed secure account management and transaction REST APIs using Spring Boot and MySQL, supporting 10,000+ daily transactions.
- Crafted 15+ modular UI components in React, wired to backend services via REST, and cut front-end build redundancy by 25%.
- Streamlined 6 high-frequency SQL queries, achieving a 40% reduction in average query execution time under peak-load conditions.

US Freelancing – 5+ Client Web Applications

React, Node.js, Firebase, HTML5, CSS, Tailwind

Aug 2024 – May 2025

Remote – US Clients

- Delivered 5+ client web applications for US-based clients – including portfolio sites and a hotel booking platform – using React, Node.js, HTML5, and CSS; all shipped on schedule and within scope.
- Integrated real-time booking and authentication features via Firebase, cutting booking workflow steps by 3 and raising end-user task completion rate.
- Achieved full cross-browser compatibility across Chrome, Firefox, Safari, and Edge using responsive CSS and Tailwind, with zero post-launch layout defects reported.

EDUCATION

Chitkara University, Himachal Pradesh

B.Tech in Computer Science Engineering

Sep 2021 – May 2025

CGPA: 8.27 / 10

Chhotakhelna Surendra Smriti Vidyamandir, West Bengal

Higher Secondary (Class XII)

Apr 2019 – Jun 2021

72.6%

SKILLS

Languages: Java, JavaScript, C, C++, SQL

Web / Frontend: HTML5, CSS, React, Bootstrap, Tailwind CSS

Backend: Spring Boot, Node.js, REST APIs, Microservices

Databases: MySQL, MongoDB, Redis, Firebase

Tools: Git, Jenkins, Postman, Linux, VS Code, IntelliJ IDEA

AI Tools: Claude AI, GitHub Copilot, LLM-assisted Development

Concepts: Web Content Management, System Design, OOP, CI/CD, Agile
